Education

Sai Gon University

Ho Chi Minh City, Vietnam

Engineering degree of Information Technology, Major in Information Technology. Expected Graduation Date: June 2026

Experience

TMA Solution

Ho Chi Minh City, Vietnam

Back-end Developer

Jun 2026 - April 2026

- Implemented dual-mode audio logic (Practice/Exam), built UIs for new features, and added an unsaved-data alert system.
- Developed REST APIs (FastAPI) for data retrieval, optimized database queries to improve execution speed, and resolved concurrency bugs in Django Admin.
- Built an AI-powered PDF automation tool to streamline database entry and configured Nginx for deployment.

Jung Talents

Ho Chi Minh City, Vietnam

Front-end Developer

June 2023 - March 2024

- Design, develop, and implement websites for English proficiency testing and English teaching.
- Worked with a team of 8 members in the country and 4 members overseas to design and deliver solutions for clients..
- Built portfolios for clients and provided training on courses such as HTML, CSS, and JavaScript.

Skills & Interests

Front-end: HTML, CSS, JavaScript, TypeScript, ReactJS, Next.js, TailwindCSS, Material-UI, Bootstrap

Back-end: Node.js (Express), Python (Django and Fastapi)

Database: MySQL, SQLite, MongoDB

Tools & Platforms: Git, GitHub, Postman, Docker, Sentry, Jira, VS Code, Figma, Cloudinary, Draw.io

Testing: Manual testing, Jest (Automaion), Postman (API testing), JMeter.

Languages: English, Vietnamese

Projects

E-Commerce Website

GitHub: https://github.com/LeDuyQuan1911/CNLTHD_Final/tree/main/Multi_vendor_E_shop-part-5_microservice

- Built a scalable multi-vendor e-commerce platform (Amazon-like) using microservice architecture.
- Developed independent services (Auth, Product, Order, Payment, Chat) with RESTful APIs and JWT-based authentication.
- Implemented full CRUD operations for product, order, and user management,...
- **Tech Stack:** ReactJS, Node.js, Express.js, MongoDB, Docker, Socket.IO.
- **Integrated third-party services:** Stripe, PayPal, Multer, Nodemailer, and Cloudinary for payments, uploads,

Le Duy Quan

and notifications.

- **Features:** email verification, secure JWT login, storefront management, shopping cart, order tracking, multi-payment methods, and admin dashboard.
 - **Design & Documentation:** Designed Use Case, Activity, and Sequence diagrams, and database schema for system analysis and development.
 - **Testing:** Manual testing, Jest (Automaion), Postman (API testing).
-

National Championship Management:

GitHub: https://github.com/LeDuyQuan1911/Project_CNPM

- Developed a National Football Championship Management System with team, player, and match management features.
- Designed and implemented full CRUD operations for teams, players, and matches.
- Tech Stack: EJS, HTML, CSS, JavaScript, Node.js, Express.js, MongoDB (Mongoose ODM), MVC architecture.
- Implemented JWT-based authentication, email verification, and an admin dashboard for complete system control.
- Features: match scheduling, result tracking, automatic ranking table, and data searching/filtering.
- Testing: Manual testing, Jest (Automaion), Postman (API testing).
